

**MARCH—APRIL
2010**

SWODA Season Opener at Sherkston Shores, May 15 & 16, 2010

View From The Bottom

With the dive season still a few months away, you think that the club has been fairly quiet. This couldn't be farther from the truth. Club members have been quite active this winter, getting their fill of warm (and sometimes cold) water diving. Some of us are still washing the salt off our gear from a very successful trip to the island of Roatan, Honduras. With beautiful, healthy coral formations, and one spectacular wall dive after another, I know Roatan is an island I will definitely return to. We also had members who decided to try their hand here back home, in the St. Clair River at 34°F. If you told us that we were a bit crazy, I don't think I can argue. A pool night in February had an excellent turnout, so much so that we will be doing another one shortly. If the dive season matches the pace of the diving that's already been going on, then I'd say that 2010 is shaping up to be quite the excellent year.

Nic Chalmers, SWODA President

Our season opener is going to be held at the Sherkston Quarry. Most SWODA divers made a weekend out of it last year and enjoyed dives in the quarry and in Welland Canal on the Saturday. The actual opening dive is on the Sunday at 11:00 but we are hoping you and your family will join us for the weekend for some diving, fun and relaxation.

Sherkston Shores are reserving Evergreen Village so we can all have trailers in close proximity to one another ...what awesome trailer trash we will be!!!

The Deluxe trailer is available for \$249

The Standard trailer is available for \$229

The Economy trailer is available for \$209

This is for Friday to Monday and includes your \$10 quarry fee.

For those that choose to bring your own trailer, sites are available from \$85 to \$105.

Unfortunately the Aquatics Manager has changed this year and they no longer have a operating dive shop. The Sherkston staff has hired a qualified person to be onsite Saturday and Sunday to fill tanks as needed.

We also will still have use of the barbeque and patio for our pot luck barbeque on Sunday. The food last year was yummy and calorie free. Looking forward to all the delicious goodness coming our way. Hope to see everyone there and looking forward to meeting new members of SWODA. Members must make their own reservations by calling Sherkston Shores at 1-877-482-3224 Remember to tell them SWODA sent you so that you are with the group.

P.S. If you have any questions, you can call Holly at 519-200-3946

Next Events: Sign-Up Night March 22nd; Pool Night March 24th

SWODA DIVING ADVENTURES

Cold enough for you?

Real men dive wet.

Dive With Mar ! April 24 & 26th

Off To America's Premier Wreck Diving Destination The warm, clear waters of North Carolina offers some fantastic opportunities for scuba divers of all skill levels. Readers of *"Rodale's Scuba Diving Magazine"* rated Morehead City as one of North America's Best diving locations. The area was recognized as offering *North America's Best Wreck Diving and Best Big Animal Encounters*. Additionally, Morehead City, North Carolina was ranked #3 Best Advanced Diving, #3 Best Overall Destination and #5 in the *Healthiest Marine Environment* categories. Dive in to the pages in this web site and discover the World Class scuba diving adventures awaiting you in North Carolina. Olympus Dive Center has enjoyed a "Top Five" or better placement in the Rodale's Readers Choice Awards for seven of the last eight years. We'd like to thank every one of our patrons for your support in these reader surveys.

Our Boat!!! The Adventure

They have 3 boats and the big boat is booked so we have that one that can hold 18 divers!! Great ocean boats with great ladders!

Winter Diving in British Columbia Don Gordon

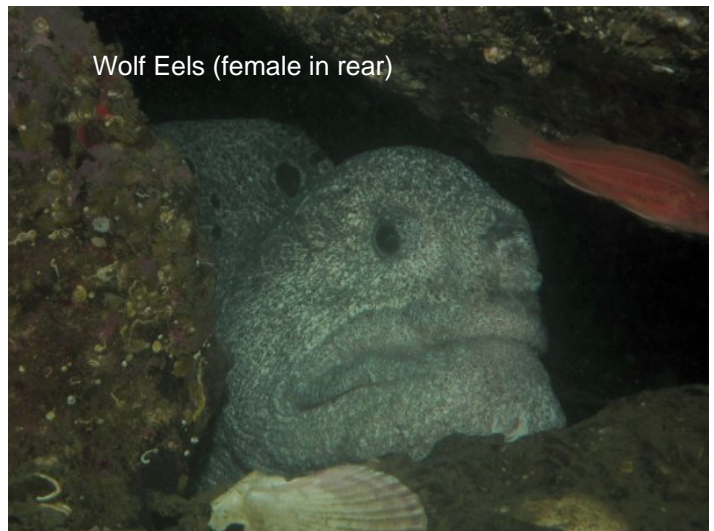

British Columbia's capital city, Victoria enjoys a picturesque setting on Vancouver Island and experiences Canada's most temperate climate making it an ideal destination for a winter dive trip. In February mild temperatures welcome Cherry blossoms and Rhododendrons. Diving is intensely popular here too and Victoria boasts at least ten well known shore dives within 30 minutes of downtown. Add to that several full service dive stores, charter operators, clubs and detailed guide books and you have a divers' paradise.

I made this trip to visit a non-diving friend and so before I went I spent some time on ScubaBoard and

Facebook and was able to connect with several local divers who were gracious and enthusiastic hosts. Tony, a naval Petty Officer, said of diving in Victoria, "If you aren't making two dives a week, then you are doing something wrong." The waters about Victoria are now known as the Salish Sea, which includes Puget Sound, Juan de Fuca Strait and the Strait of Georgia. Victoria itself is on the Saanich Peninsula of Vancouver Island that is set apart from the rest of the island by Saanich Inlet. Our first dive was a glorious wall dive to 130' at Willis Point on the inlet. Divers favour the inlet because no matter the weather you can almost always dive here. We followed this up with a night dive at Saxe Point, which is right in the metropolitan area.

Ogden Point is billed as Canada's best shore dive and having made a pair of dives there with my buddy Michael I am not prepared to dispute the fact. Diving is from a long breakwater that makes for easy entry and

exit. There is ample parking and an on-site dive shop, including a restaurant. Sealife is abundant here and the water clarity was excellent. The day's highlight was the discovery of the den of a mated pair of Wolf Eels. These rich waters are home to a great variety of anemones, nudibranchs, crabs and fish, and you will often catch a glimpse of marine mammals as well.

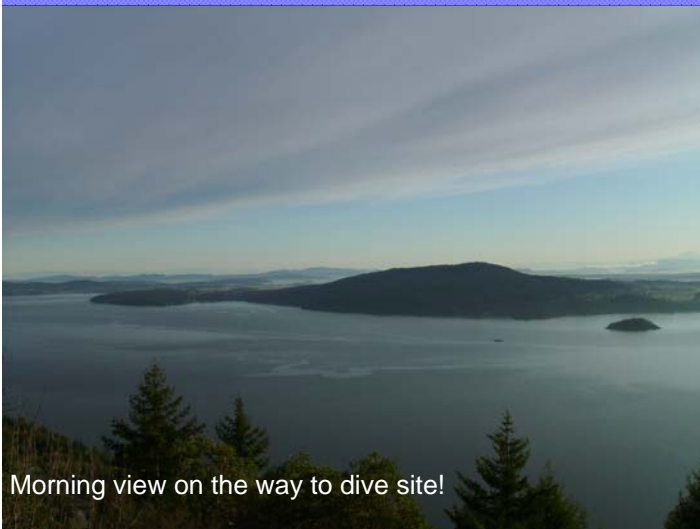

As great as the shore diving was I wanted to get out on the water surrounding the Gulf Islands and so I spent a couple of days diving from Chemainus, about an hour north of Victoria. My guide and buddy was Peter Luckham, owner of [49th Parallel Diving](#) on Thetis Island. Peter is responsible for one of the most unique artificial reefs to be found anywhere having sunk a Boeing 737 in 2006 in cooperation with the [Artificial Reef Society](#) of

Winter Diving in British Columbia Don Gordon

Morning view on the way to dive site!

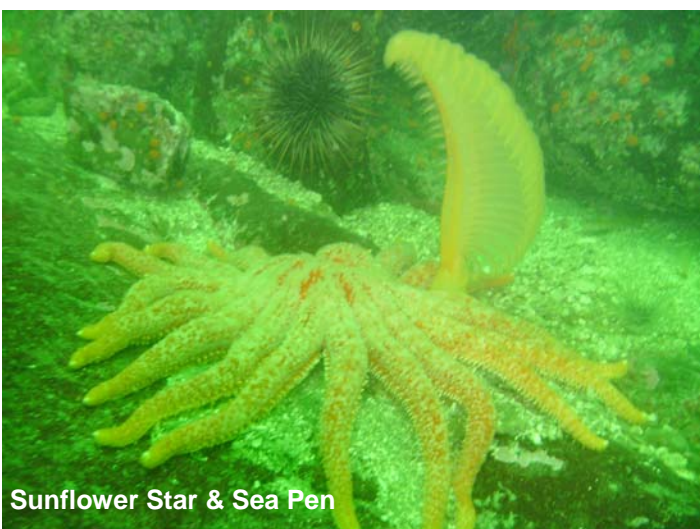

Giant Pacific Octopus

BC. What a privilege it was to dive this site with its creator. In just a few short years the aircraft has become home to a dazzling array of life including colonies of Plumose Anemone and Feather Stars. This [YouTube link](#) chronicles our dive.

Peter must have judged my skills to be up for some adventure as on our second day of diving we took his small boat out to dive in the Porlier Pass, which is a narrow waterway between two islands and as such is subject to strong tidal currents. The trick is to dive either side of the slack when the tide changes direction from ebb to flood. Peter led this with military precision, tide tables in hand as we dropped precisely on time. Our first task was to further secure the anchor so that we had a boat to return to and then away we went. Due to the rushing volumes of water this site is super-abundant. At first I thought I saw a lot of Brittle Stars on the grey rocks but

closer examination proved that I could not see any rock at all just thousands of stars. The highlight of this dive came at the end when we had a rare daylight encounter with a Giant Pacific Octopus that expressed an interest in our anchor. We were able to spend some time with this lively creature until the tide dictated that we leave.

This was my first taste of diving in BC and I have barely scratched the surface as there are wonderful opportunities all over the extensive coast line. I'll be heading back and I would be glad to help set up a trip for interested SWODA members. If this has piqued your interest let me know.

Book Review

Dr. Sylvia Earle's new book declares that conservation is promoting the wrong colour

In her latest book, *The World Is Blue*, famed oceanographer Dr. Sylvia Earle makes a passionate and methodical argument for conserving the world's oceans – not as one more item to be added to an ecological wish list, but as an issue that needs to be at the top of that list. The oceans need our undivided attention as it is these life-giving bodies of water that impact, regulate, and govern the environmental processes on land and in the air on which we depend.

“Even if you never have a chance to see or touch the ocean, the ocean touches you with every breath you take, every drop of water you drink, every bite you consume. Everyone, everywhere is inextricably connected to and utterly dependent upon the existence of the sea.”

At a time when going “green” is both necessary and trendy, Earle takes nothing away from our current terrestrial focus, but makes the strong case that the health of the oceans – the “blue” that makes up over 80% of the earth's surface – must be of equal, if not primary, concern. Using facts gleaned from recognized scientific research and anecdotes from personal experience and those of other oceanographers, scientists and conservationists, she weaves a complex tapestry of interdependent marine processes that give us the majority of our air, the source of our weather, and the greatest diversity of life on the planet. But it is a fabric that is being torn to shreds through our historically misplaced belief that the ocean is ours for the taking.

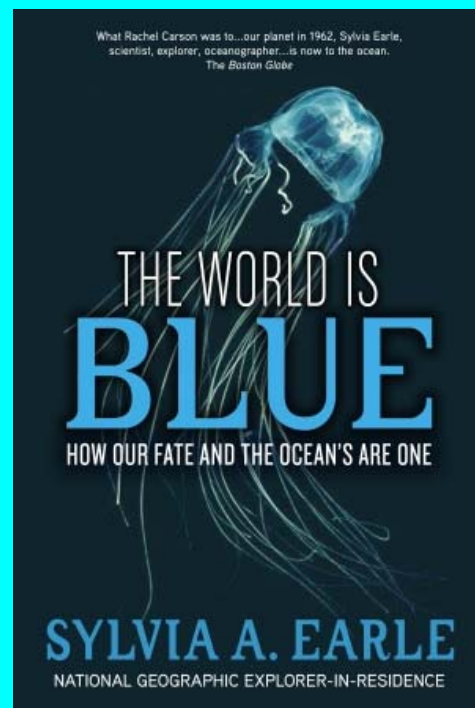

Earle takes you through the current state of the ocean step by step. First, she examines the taking of ocean wildlife, from mammals to fish to shellfish, and our belief in the ocean's limitless bounty as personified in the concept of Maximum Sustainable Yield (MSY) – which drove much of our fishery management policies since the 1930s by assuming that a sealife population, when heavily fished, will respond with maximum reproductive efficiency, thereby producing a surplus that will sustain the population. Great plan, but no one remembered to tell the fish, and so, by the mid-70's, MSY was unsustainable as were many commercial fisheries as a result.

From there the book takes the reader through the other major issues threatening the seas today. Plastics and their consequences on sealife and fundamental chemical processes in the ocean; the loss of biodiversity – from minute phytoplankton to some of the ocean's largest animals; drilling, mining, and shipping; and the controversial topic of today: climate change.

As a former chief scientist for the National Ocean and Atmospheric Administration (NOAA) and, currently, explorer-in-residence at the National Geographic Society, leader of the Sustainable Seas Expeditions, and active participant in a long list of policy-making organizations and marine think tanks, Earle brings a subtle political perspective that you do not find in many other books on the subject. Personal involvement is important and she has plenty of suggestions for each of us to consider. But the book is peppered with indications as to what is being done in the decision-making circles, which kept reminding me of the need for making our elected officials accountable.

“Knowing is the key to caring, and with caring there is hope that people will be motivated to take positive actions. They might not care even if they know, but they can't care if they are unaware.”

The World Is Blue is an extremely accessible book, one that would provide a conservationist with logical arguments and reassurance while providing enlightenment and a new way of thinking for the yet unconverted. This is not a tome to doom and gloom. Yes, it pulls no punches and lays out the consequences if we choose not to act, but what makes this book an uplifting call to arms rather than a scolding is Earle's enthusiasm and sense of wonder with the ocean. It's obvious to the ear at her many speaking engagements and when I have been fortunate to chat with her one-on-one – and it comes through loud and clear in *The World Is Blue*. This is someone who truly loves the sea and loves life and knows how they are forever intertwined. A must read.

Museum of Ontario Archaeology Presents

8th Annual Underwater Heritage Program “Sir John Franklin - Quest for the Northwest Passage”

Featuring Key Note Presenter
David Charles Woodman,
Mariner, Author & Explorer

Saturday, April 10, 2010

Morning Seminars 8:30am-12:30 pm

Registration & Refreshments

“What We Do” Raimund Krob, President Ontario Underwater Council

“29 Years of Saving Our Underwater Heritage”

Brian Prince, President Save Ontario Shipwrecks

“Franklin’s Land Expeditions”

Miggs Morris, Author & Former Arctic Resident

“Arctic Challenges Franklin Faced”

“Royal Navy During The Franklin Era”
Commander John Creber (Retired),
Canadian Forces Navy

“Why Franklin Failed”

John MacDonald, Archaeologist

“Underwater Archaeology in Ontario”
Dr. Simon Spooner, Marine Heritage Advisor,
Ontario Ministry of Culture

“Franklin and The Inuit Worldview”
David C. Woodman,

Afternoon Seminars 1:30-5:00 pm

“Lake Huron & Georgian Bay – Wrecks to Dive”

Mar Smith, Dive Instructor

“Lake Erie (Eastern Basin) Mooring Project”

Ian Marshall,
Retired Technical Dive Instructor

“Underwater Archaeology at Kingston’s National Historic Sites”

Jonathan Moore, Underwater Archaeologist,
Parks Canada

“POW Projects” Michael Hill, President,
Preserve Our Wrecks

“5 Levels of Diving” Tom Wilson, Underwater Photographer & Dive Instructor

“How To Become An Arctic Explorer by Accident” David C. Woodman

Evening Program 7:00-10:00 pm

Wine and Cheese Reception & Presentation:

“In Search of Terror – Shipwreck Hunting In the Arctic”
Image Show & discussion with
David C. Woodman

“60 Second Pitches”

Raimund Krob, President,
Ontario Underwater Council
Brian Prince, President
Save Ontario Shipwrecks
Michael Hill, President
Preserve Our Wrecks
Nic Chalmers, President SWODA
Jim Root, President
London Skin & Scuba

Event Tickets:

\$10 for morning seminars
\$10 for afternoon seminars
\$15 for evening wine & cheese presentation
\$30 for all events

Door Prizes
Silent Auction
Exhibit Displays

Limited Tickets Available — Contact the Museum to Reserve:

Roatan Trip—March 2010

One of my favourite dives was the dawn dive on the last day. I night so clear you could see the moon from 40 feet under, then watching the sun come up swimming beside a wall, it was quite spectacular all around.

Nic Chalmers

Just returned from a dive week in Roatan, Honduras, at Fantasy Island, with Mar's group. As an advanced diver with only a few dives under my belt this was truly a unique experience. Every dive was my favourite dive. I saw and learned so much! The coral reefs are beautiful and teeming with life. I became more comfortable with my gear and buoyancy. I learned to fin or not to fin (still a work in progress) and to be one with my computer (a love-hate relationship because I am a techno moron) A "Big Thanks" to everyone on the trip for their patience and understanding for the "newbie". I learned from all of you.

Just a word of warning to anyone considering a trip with this group-Beware of the dreaded deadly underwater rubber chicken, people who suggest tequila shots (my memory is fuzzy on that one) and runaway mopeds! Thanks again for a great memory! Janet Stuart

Join Us On Facebook

It has been long overdue... SWODA now has a Facebook group! Join us by clicking [here](#) and keep in touch with fellow SWODA members, past and present--sharing your pictures, videos, and memories. Non members interested in the club are also more than welcome to join! An included feature of the group is an RSS feed of our website updates. Each time story is posted on our site's blog, a copy will be added to the Facebook group so you can stay up-to-date with club activities. Just another way we're keeping divers in touch!

Pool Night—March 24th

Need a diving fix? Want to blow off the cobwebs? Get ready for a winter trip? Or check out some new gear?

Our popular Pool Night is back.

Wednesday, March 24 at the London Downtown YMCA 382 Waterloo Street.

IMPORTANT DETAILS—Please read carefully.

The door from the parking lot into the pool is only open for a brief window at 7:30. If you miss it you will have to lug your gear through the whole "Y".

Free parking is available. Enter from Waterloo St and try and make your way to the lower level near to the exit ramp. The pool door is here and it will be open briefly at 7:30 and then again when we leave at 10. Pool time will be 8 until 10. Cost is \$5 per participant.

SWODA off Diving in Brockville September 10-12, 2010

Diving in the Brockville area is always great fun.

The water temp is great in September and visibility, withstanding a storm just before we go, is some of the best in the great lake diving opportunities.

We will be staying at **Caigers Resort**, Just west of Brockville closer to Rockport, right on the St Lawrence River. We will have rooms right on the waters edge, with some room closer to the pool, great area to BBQ and tell stories with breakfast served in the dining lounge at 7.30 am each morning. Our boat will be with "Seaway Charters"; Captain Kevin will take us to all our favorite spot to dive. I must say Brockville is full for favorites.

Some wrecks that we have dove in the past are:

Kingshorn- April 27, 1897, the tug Hiram A Walker under Captain Boyd had seven barges undertow in the American channel near Thousand Island Park. She was caught in a storm losing barges on the south shore and 2 barges at Johnston's light opposite the park. With four barges left the Walker headed for Grenadier Island where the Captain of the Kingshorn reported his craft leaking badly. The Walker headed for Rockport with the injured barge however lost her 1/2-mile from Rockport in 90 ft. of water. Located directly in front of the Customs Office and Andres's Marina/Rockport Dive Center at Rockport, this wooden vessel sits in 90 ft. of water and unfortunately in the middle of the small boat-shipping channel.

A.E. Vickery- Built in 1861 and launched July 1861 at Three Mile Bay, NY as "J.B. Penfield" and sank August 17, 1889. This wooden three masted schooner (136.2 ft. x 26.2 ft. x 10.8 ft.) was renamed A.E. Vickery Feb. 25, 1884 and struck a rock while entering the American "Narrows" with a cargo of 21,000 bushels of corn destined for Wisers Distillery at Prescott, Ontario. Normally buoyed and located along side Rock Island Reef Light, divers can follow the buoy line into a very quick surface current onto the shoal head in 25-30 ft. of water. The bow of the Vickery lies about 10-15 ft. away at a depth of 65.

Henry C Daryaw – Another favorite with a good current at the surface. The Daryaw went down in 1941 with the lose of one life. Was built in England in 1919 and is 219 ft long, he lies upside down and has great swim throws/under and at the end of the dive you could drift back to the mooring.

Keystorm - Built 1910, sank 2 years later. Bow sits in 30ft and stern gets to 110ft and usually has lots of fish around the wheelhouse and also has great swim throws. This site does have a good current at the surface.

Robert Gaskin- Sank in 1889 Triple masked wooded barge, 132ft long and has lots of swim throws, always a fun wreck to dive.(We could do this from shore this time from our cottages)??

Lillie Parsons – A 19th century Great Lakes centerboard schooner. Built of white oak and rigged fore and aft, she is 131 ft long with 500-ton capacity in her 10-ft hold. She had in her cargo hold: coal, lumber, wheat, barley, railway iron and salt, and was sailed by a crew of six men. She was launched in September from Tonawanda New York and on her last voyage, to Brockville; she hit a rock and took on water due to the shift of cargo during a squall just off Sparrow Island in August 1877. (She is a favorite dive site with our group)

The diving around Brockville can be challenging and fun, this area is mostly advanced open water diving, but the visibility makes the dives seem like down south dives. The 70° so this makes the diving outstanding every year. If you're not sure if you're ready for this type of diving, please talk to me.

This is a great SWODA group weekend. Fun is always had.
Don't wait and miss the boat. Book today.

Point Traverse 2010

With
Dive with Mar - SWODA

Lake Ontario - Picton—Sept 18 and 19th 2010

Approximately four and a half hours east of London, there is a place near Belleville called Prince Edward County and Point Traverse. This area sports some of the finest shipwreck diving that Eastern Lake Ontario offers. Our hosts George and Susan provide a spacious tugboat, "Ducks Diver", an air station, cottage style accommodation with cooking facilities and some of the most peaceful scenic landscape in central Ontario. This is one of the best spots to view intact wooden ships from a bygone era. Some of the wrecks that we dive include the majestic City of Sheyboygan, the beautiful schooner Katie Eccles, and the huge tug, the Frontenac. Other favorites include the Annie and the Olive Branch. While these wrecks can be reached from Kingston, they are much more accessible from Point Traverse.

Visibility in the spring & fall has often been very good. I have seen visibility approximately 100 feet, allowing us to view the entire 110 foot length of the *Frontenac* at approximately 60 feet. This has been a popular trip and fills up quickly. The trip is limited to 12 people.

A deposit of \$150. will hold your spot. All divers will be required to sign a waiver of liability prior departure from the dock. So bring you C cards!

"Ducks Diver" Tug at Harbor

Wreck of the *Olive Branch*

Point Traverse offers a window to some of the most pristine wooden sailing vessels in the lower Great Lakes. It offers attractions to divers of all levels. As well a great place to walk & bird watch~
